Reading Recommendations for Quantum Mechanics II

The core textbook for this course is

- "Modern Quantum Mechanics", J. J. Sakurai and J. Napolitano, 3rd edition, Addison-Wesley (2021). Available at the University of Iowa library.

We will cover selected topics from chapters 5 to 8 of the third edition.

1. **Other basic textbooks**:
   (a) "Principles of Quantum Mechanics", R. Shankar, 2nd edition, Springer (1994). Available online and at the University of Iowa library.
2. **Other readings**:
   (a) "Feynman Lectures on Physics, Vol. III: Quantum Mechanics", R. P. Feynman, R. B. Leighton, and M. Sands, Addison-Wesley (1965), also available at `https://www.feynmanlectures.caltech.edu/III_toc.html`. Available online.
   (b) "Lectures on Quantum Mechanics", Weinberg, S., Cambridge University Press (2013). Available online.
   (c) David Tong's notes on "Applications of Quantum Mechanics", available at `https://www.damtp.cam.ac.uk/user/tong/aqm.html`. Available online.
   (d) "Atoms, Molecules and Optical Physics 1, Atoms and Spectroscopy", Ingolf V. Hertel, Claus-Peter Schulz, Springer (2015). Downloadable from the University of Iowa library.
   (e) "Atoms, Molecules and Optical Physics 2, Molecules and Photons - Spectroscopy and Collisions", Ingolf V. Hertel, Claus-Peter Schulz, Springer (2015). Downloadable from the University of Iowa library.
   (f) "Space-time approach to nonrelativistic quantum mechanics", Rev.Mod.Phys. 20 (1948) 367-387, R. P. Feynman. Available online.
